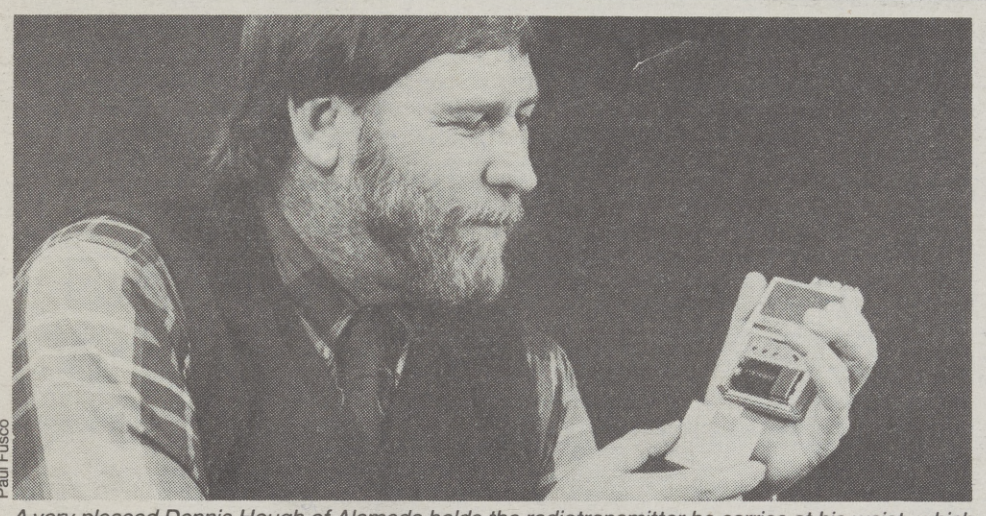
UCSF Newsbreak



Paul Fusco

A very pleased Dennis Hough of Alameda holds the radiotransmitter he carries at his waist, which stimulates the electrodes implanted in his brain to keep him pain free.

A Revolution in the Treatment of Intense Chronic Pain

Dennis Hough's problems began 10 years ago when, in a work-related accident, he landed on his spine, rupturing three lumbar vertebrae. From then on he was plagued by shooting pains in his legs and shoulders so intense he could not stand upright.

He rapidly grew tolerant of pain killers, and spent several years shuffling from bed to sofa, seeking relief in a pathetic fetal position.

Then six years ago, he read about deep brain stimulation, a pain-control technique pioneered at UCSF by neurosurgeons Yoshio Hosobuchi, MD, and John Adams, MD, which can rid some patients of chronic pain by the stimulation of electrodes implanted in the brain. Hough received an implant in 1981 and is one of Hosobuchi's resounding successes.

The above is a dramatic example of the success of new treatments for chronic pain that have arisen in recent years, primarily as a result of basic laboratory discoveries of how the body perceives and responds to pain.

UCSF neurobiologist Allan I. Basbaum discussed these major world-wide breakthroughs in treating chronic pain in a talk that opened the annual meeting of the Society for Neurosciences on November 9 in Washington, DC. Basbaum is part of a UCSF team, which includes Howard Fields, Henry J. Ralston and Nancy Lee, that has the only NIH grant in existence to study mechanisms of pain.

The new treatments cover a wide range of approaches, from Hosobuchi's deep brain stimulation and nerve stimulation by electrodes placed on the skin, to nervous system blockers, pain killers derived from hot peppers, and synthetic analogues of the body's own pain killers. Basbaum and his colleagues, including rheumatologist Jon Levine, contributed to many of these new advances.

Also at the neuroscience meeting, UCSF researchers reported that increases in a normal brain chemical may contribute to brain damage following traumatic injury—and that a drug that blocks action of the chemical reversed certain consequences of brain injury.

The findings may have implications for treatment of brain injuries, such as those suffered in falls or car accidents, according to the conductor of the study, neuroendocrinologist Tracy McIntosh, PhD, at the UCSF Center for Neural Injury located at the VAMC.

Levels of dynorphin, one of the body's natural opiates called endogenous opioids, were greatly elevated in the brain two hours after brain injuries in animals, McIntosh reported. "What's exciting about our study is that we found increases of dynorphin in the areas with the most signs of injury," McIntosh said, "and this correlated very well with reduced blood flow in those areas."

Usually, blood pressure falls precipitously after brain injury, and normal brain electrical activity drops. "But in animals treated with a drug that blocks dynorphin receptors, blood pressure improved significantly," McIntosh noted, "and the EEG returned toward normal."

Symposium on International Health Highlights Gretta Day Dec. 3

The entire campus is invited to honor Margretta M. Styles, RN, EdD, as she steps down as dean of the UCSF School of Nursing, at the "International Health: Issues and Commitments" symposium on Wednesday, December 3, from 9 a.m. to noon in Cole Hall.

Regent Lecturer Thomas A. Lambo, MD, deputy director general of the World Health Organization, will discuss "International Issues in Global Health Care." A member of WHO since 1971, Lambo did pioneering work on the psychosocial aspects of mental disorders in Africa which included developing an experimental community mental health scheme at Aro. The film "Healing at Aro" by the United Nations is on his work.

Featured speakers, to be greeted by Chancellor Krevans and chair of the faculty, Dorothy Oda, will include:

- "Policy and Policy-Making for International Health." Constance Holleran, executive director, International Council of Nurses, Geneva;
- "The Role of Private Foundations in International Health." Helen Grace, executive director, W.K. Kellogg Foundation;
- "The Role of the University in Global Health Care: A Panel." Moderated by Anne Davis, professor, mental health and community nursing, School of Nursing; Panelists: John Green, professor and dean, School of Dentistry; Virginia Ohlson, professor and assistant dean emerita, international studies, College of Nursing, University of Illinois; Steven Schroeder, professor and chair, general internal medicine.

Styles will step down as dean as of January 1, 1987, a post she has held for the past 10 years. Under her skillful direction, the School has prospered and grown and is ranked number one among graduate nursing schools in the US. The School has achieved a great deal under Styles, including getting its first organized research unit—The Institute for Health and Aging, a new PhD program parallel to the DNS program, a computer teaching facility and international involvement in health care and nursing.

Styles, who next year will assume full professorial duties in the School's Department of Mental Health, Community and Administrative Nursing, recently was elected to a two-year term as president of the American Nurses Association, the largest and most influential nursing group in the country.

Marina Fusco

Dean Styles with (left) Director of Nursing Helen Ripple and nurse Sue Walker

UCSF, Mount Zion Develop Joint Center for Aging

A new Center for Aging Services Research will link UCSF social, behavioral and policy scientists and Mount Zion clinicians to examine issues such as the cost and burden of Alzheimer's disease and osteoporosis, stroke rehabilitation, use of medications, social factors involved in complying with medical advice, and how loss of independence affects elderly people.

By looking at these issues through the eyes of various disciplines, researchers hope to come up with solutions to a national problem—providing adequate care for the growing number of older people.

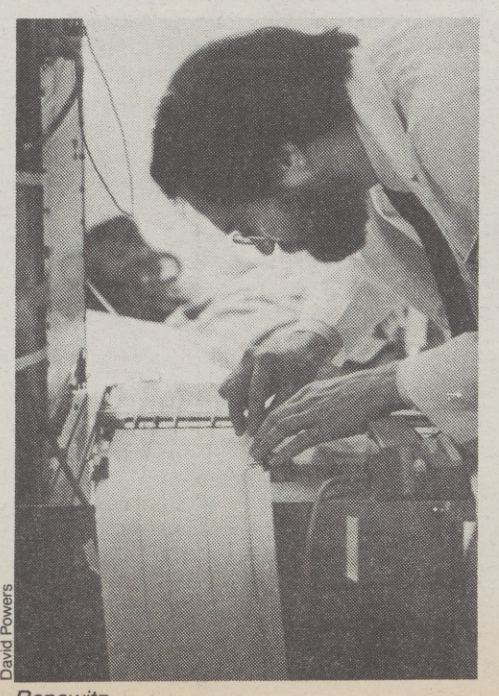
The director of the new center is Carroll L. Estes, PhD, who heads the UCSF Institute for Health and Aging. Lawrence Z. Feigenbaum, MD, who heads the San Francisco Institute on Aging based at Mount Zion, is the codirector. In addition to research, the joint center will promote gerontologic training involving social, behavioral and policy scientists in clinical settings.

Some 20 full-time investigators and staff at the Institute for Health and Aging conduct research and analyses of major issues related to health and aging. Primary focus is policy-oriented research, with health services and clinical research contributed by scientists in the disciplines of dentistry, medicine, nursing and pharmacy. Among topics the Institute is researching are chronic disease and long-term care of the elderly, effects of cost containment and Medicare financing, disease and injury prevention, and innovative institutional and community-based services.

The SF Institute on Aging has a long tradition of promoting the health and well being of older people through its extensive community-based services, geriatric education and training programs, and clinical health services research. With more than 17 programs, the Institute offers both in-home support and outpatient care for older patients and their families.

Smoking Less Helps, But Not Much

UCSF psychiatrist Neal Benowitz, MD, associate professor of medicine, now reports that smoking fewer cigarettes is helpful in reducing your intake of tar, nicotine and carbon monoxide, but the benefits are not as great as had been expected.



David Powers

Benowitz

"Quitting cigarettes still is the best idea," said Benowitz. "If you can't stop, smoking fewer cigarettes may reduce exposure to toxins." However, the researchers found that smokers tended to compensate for smoking fewer cigarettes by smoking them more intensely. "Smokers took in more smoke per cigarette." In fact, he said, the smokers tripled their intake of toxins per cigarette.

Benowitz and his colleagues believe that when smokers are denied their normal nicotine intake, they compensate by puffing more deeply on each cigarette and by smoking it to a shorter length. The smoke inhaled at the end of the cigarette is more toxic, filled with more tar, nicotine and carbon monoxide, than smoke from the beginning of a cigarette.

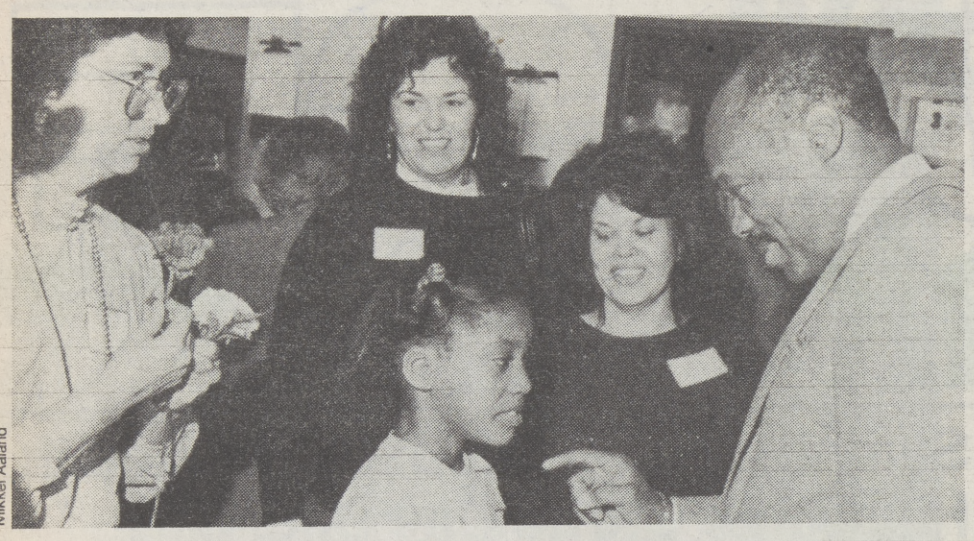
"Our findings do not contradict the proposition that smoking fewer cigarettes per day poses less risk to health than smoking more cigarettes," the report said. "However, the magnitude of the benefit from reduced exposure to toxins was much less than expected." The researchers also pointed out that their findings may explain why some smokers can cut down on their cigarette consumption but find it difficult to quit entirely.

Willie Brown on Child Care

Speaker of the Assembly Willie Brown was on campus November 13 to speak at the Friends of the Marilyn Reed Lucia Child Care Study Center's annual meeting and reception.

Brown asserted that child care is not politically popular now, and urged those in the audience to not only continue to support child care at UCSF, but to exert pressure on those who make the decisions.

He is seen here with Takira McIntosh, daughter of Child Care Center assistant teacher Tammy Powell; (left) Child Care Center director Meryl Glass; public affairs consultant Barbara Atkinson from the UCSF Office of Public Service Programs; and Marsha Beersdorf, staff aid to Senator Milton Marks.



Mikkel Aaland

Right Down Santa Claus Lane

Yes, it is a little early to be talking about the holidays ("It isn't even Thanksgiving yet!"), but all of us here at UCSF are *so* busy that it's important to start marking our Day-at-a-Glances NOW.

There's no doubt in anyone's mind that UCSF knows how to party. In the past, our campus holiday celebrations have not been terribly shabby, in fact, most have been fairly spectacular and this year's bash will be no different.

This year's all-campus holiday party will be on Monday, December 15, from 3 to 7 p.m. in Millberry Union. And this year we even have a theme . . . Winter Wonderland!

If you were at last year's holiday fete you probably felt just a bit cramped. There were over 3,000 folks sloshing down egg nog and gnawing roast beef in the lounges and gym of Millberry. Well, this year the Millberry cafeteria will be added to our "wonderland," where there will be a grand buffet and a great jazz trio. Cocktails, gourmet hors d'ourves and a pianist will grace the lounges and a dance band will keep things hopping in the gym.

Plus, in front of Millberry Union there will be professional ice skating for the first one-and-one-half hours of the party!

So, if you want to be part of a great time—tapping your toes, feeding your faces, gazing at six-foot snowflakes, sitting on Santa's knee, nosing up to a polar bear and latching onto your favorite friends—join in the fun on December 15.

Speaking of Millberry Union and the holidays, don't forget to check out all of the great shopping buys at the Holiday Crafts Faire, Wednesday and Thursday, December 3 and 4, 10 a.m. to 4 p.m. in the Millberry gym. With double the number of artisans this year, the faire will boast hand-crafted items, selected specialty foods and free noon-time entertainment.

You Can Help Fill the Phantom Fund

The UCSF Faculty Wives reminds everyone that they will accept donations right to the end of the year for their 17th annual fall phantom fundraising for student loans. Some 200 UCSF students have benefited from loans from the fund over the last several years. Every dollar you give goes directly to students because constributions are free from administrative costs. Checks should be made payable to the UCSF Faculty Wives Student Loan Fund and mailed to Mrs. David Allen, 2345 California Street, SF, CA 94115. For further information call 388-2883.

Batik Tapestries Exhibit Begins

Artist Jillian Tyrrell will display her batik tapestries at the Faculty/Alumni House from Monday, December 1, through the month of February.

A native of London, Tyrrell has had some 50 exhibitions of her work in this country and England over the last 12 years. Her medium is batik, or wax painting, which can be a somewhat laborious process whereby portions of fabric are painted with melted wax before being dyed. When the wax dries it randomly cracks leaving a pattern of small fine veins where the dye has penetrated the fabric.

A reception for the artist will be held on Wednesday, December 3, from 4:30 to 7 p.m. For further information call x64723.

Evaluate Your Teaching Jan. 10

A workshop for clinical faculty to evaluate their teaching will be held on Saturday, January 10, from 9 a.m. to noon at the Faculty/Alumni House. Sponsored by the Association of Clinical Faculty, the workshop will be led by Barbara Gastel, MD, assistant dean for teaching, and is limited to the first 35 preregistered clinical faculty members of the School of Medicine. For course and registration information call x61471.

United Way Winner!

Associate professor Emil Lin (left) opens his raffle prize while Toby Herfindal, chair of clinical pharmacy, curiously looks on during the School of Pharmacy's United Way raffle and party. Some 200 people attended the event on November 11, which Herfindal helped organize, at UCSF-Laurel Heights.

Lin won one of 30 donated raffle prizes. What was it? Lunch for two at PJ's, donated by pharmacist Robert Ignoffo. The School has plenty to be proud of. . .this year its United Way participation tripled! Results of how the entire campus did in its participation will be in the next issue of *UCSF Newsbreak*. (For the Med Center's raffle winners see page 8.)

Mikkel Aaland

New Members to Campus Advisory Groups

Two new members have been added to the UCSF Board of Overseers. They are M. Arthur Gensler, Jr., founder and president of Gensler & Associates, the third largest architectural firm in San Francisco; and G. Kirk Raab, president and chief operating officer of Genentech, Inc., and director of Applied Molecular Genetics, Inc.

Five new members, all from affiliated foundations, have been appointed to the UCSF Foundation Trustees. They are Jesse B. Grove, partner in the law firm Thelen, Marrin, Johnson & Bridges, and director of Family House, Inc.; Frank Mainzer, MD, chair, radiology, St. Francis Hospital, and vice president, Radiology Research & Education Foundation at UCSF; Mae Pape, community services manager, Transamerica Corporation, and president, board of directors, Friends of LPPI; Baxter Richardson, partner in the law firm Richardson & Jones, and treasurer, UC Valley Medical Education Foundation; and Carl Goetsch, MD, former UCSF clinical faculty member, ob/gyn, and a member of the Ob/Gyn Research & Education Foundation at UCSF.

Health Messages by Pickle Family

Anne Dowie

"The Pickle Family Circus is going to school, so let's all join the fun and learn some healthy rules" is the theme song for an upcoming series of musical video health messages for young children to be aired on PBS. UCSF's David Watts, associate professor, medicine, is executive producer; clinical pharmacologist Linda Bernstein is project director and writer.

New VA Psychiatry Program Awards

Two UCSF researchers at the VAMC are two of six winners of grants from a new VA Psychiatric Research Training Program. The two-year grants were awarded to Bruce Turetsky, MD, and Robert Outenreath, MD, PhD, and will be used to gain research experience and additional education in neuroscience.

A 1982 UCSF graduate, Turetsky now is completing a UCSF psychiatry residency. In the new program, his research will focus on how changes in brain chemistry affect the way people process information from the senses and how abnormalities in these processes may contribute to mental disorders. He will work with medical and clinical psychologist George Fein, PhD, and psychiatrist Enoch Callaway, MD.

Outenreath will study nervous system development, attempting to identify molecules that coordinate proper "wiring" of nerve networks. He will work with Samuel Barondes, MD, professor and chair of the Department of Psychiatry and director of LPPI, and Albert Jones, MD, professor of medicine and anatomy and associate chief of staff for research and development at the VAMC. Outenreath received both his PhD (1980) and MD (1983) degrees from the University of Texas.

Whoops

In the last issue of *UCSF Newsbreak* . . .

The School of Pharmacy students were not standing in front of their own pumpkin entry, but instead that of Nursing Administration.

In the Gazette section, the correct title for Lloyd H. Smith is associate dean for special projects and admissions.

Construction

- **Fourth floor Clinical Sciences building.** Traffic is disrupted because of construction of the Infectious Disease Laboratory. Construction alerts warning of noisy activities and utility shutdowns are being posted at strategic locations, and signs are being devised to help pedestrians find their way.
- **Second floor Clinical Sciences building.** Three thousand square feet of lab remodeling has begun with work on both sides of the corridor. Pedestrian access will not be interrupted, but expect the usual noise and activity, as well as construction alerts if anything unusual is about to happen.
- **Clinical Science elevators.** Shutdowns to occur in January when smoke enclosures (safety devices to keep smoke out of the elevators in case of fire) will be built. Ample notice will be issued prior to any shutdowns.
- **ACC staff lounge.** Beside the noise, access to the post office satellite on the plaza is intermittently impaired or blocked. If you need to buy stamps and can't get to the P.O., you can use the stamp machine at the gift shop in the Moffitt Lobby — or go to Mailing Services at S B26. They don't have stamps, but they can take your money, mark your postage, and mail your letter or package.
- **Moffitt elevators.** Three cars now are completely refurbished and probably by the time you read this the fourth, and last car, will follow suit. Now the two freight elevators (directly behind the main elevator bank to the east) are getting new operating panels — so they'll be out of service, one at a time.
- **Medical Science elevators.** New operating panels also are being installed which is why they're out of service (one by one). Next year the cars will be refurbished, and when that's finished, they should run faster than they do now.
- **Second floor of 145 Irving.** Offices are being remodeled for the Benefits and Financial Planning groups. The contractors are working long hours and weekends to finish by the first week of December.
- **G Level Millberry Union.** Several offices soon will be under construction. When complete (late March), occupants will include Materiel Management, Transportation, Accounting satellite, Telecommunications and Outgoing Mail.
- **ACC ceilings.** In December a voice notification system will be installed in all ceilings. This will be used by firemen to issue instructions and information to building occupants in the case of an emergency. Noisy construction will take place outside normal business hours. Building Management will make an effort to keep occupants informed when and where the work will take place.
- **Medical Sciences, Clinical Sciences and Health Sciences buildings.** Over the last several months, modern life safety systems have been installed, which include smoke detectors, fire alarms, speakers, fan control systems, sprinklers, panic hardware on doors and fire service elevator operation. The very last of the work now is being completed. Thanks for your patience; the buildings are now much safer places.
- **Millberry Union restrooms.** Right after the holidays, these long-neglected areas near the Faculty Club and downstairs across from the cafeteria will receive a long overdue facelift. The renovation will include the addition of handicap facilities in the downstairs facilities. Restrooms will be out of service during the interim.

UCSF *Newsbreak*

UCSF Volume 1, Number 8, Nov. 22-Dec. 12, 1986. Published by the University of California, Third and Parnassus, San Francisco, CA, 23 issues per year—biweekly, except triweekly July, August and December. Application to mail at second-class postage rates is pending at San Francisco, CA. Postmaster send address changes to *UCSF Newsbreak*, News & Public Information Services, University of California, San Francisco, 532 Parnassus, Room 300, San Francisco 94143-0250.

Deadline for the next issue, which will cover Dec. 13-Jan. 2, will be Tuesday, Dec. 2. Please send campus news copy to Allen Balderson and Medical Center news to Dawn Finch, both at the above address. Last-minute copy can be taken over the telephone by calling x61541 or x62557.

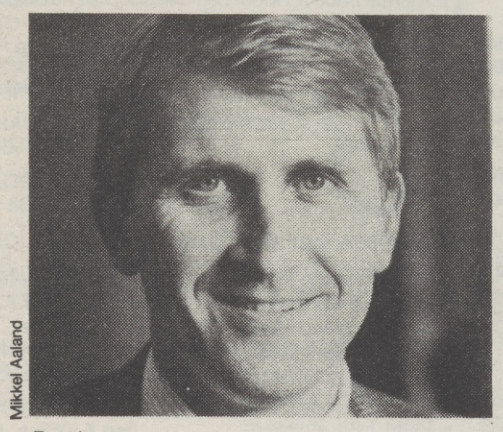
Honors & Awards



Mikkel Aaland

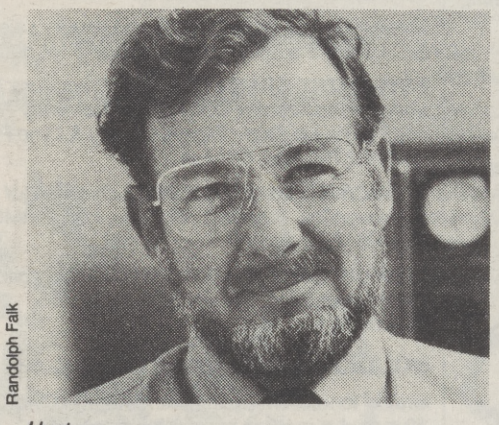
Busch

Michael P. Busch, assistant clinical professor, laboratory medicine: Awarded the 1986 Clinical Pathology Residency Award of the American Society of Clinical Pathologists.

Robert Foothorap

Estes

Carroll L. Estes, professor & chair, social & behavioral sciences, School of Nursing: Awarded an Honorary Doctorate of Humane Letters by Russell Sage College, Troy, NY.



Randolph Falk

Hunt

Thomas K. Hunt, professor, surgery: Received the American Trauma Society Distinguished Service Award. Also was invited speaker at the First Beijing International Conference on General Surgery, Beijing, Nov. 3-9.

Carleton Mathewson, Jr., clinical professor emeritus, surgery: Received the 1986 National Safety Council's Surgeon's Award for Service to Safety.

Mary-Ann Shafer, associate professor, pediatrics: Elected chair of the Section on Adolescent Health of the American Academy of Pediatrics.

David A. Wood, professor emeritus, pathology: Appointed to the California Cancer Advisory Council by Governor Deukmejian.

Paul Fusco

Greenspan

Deborah Greenspan, associate clinical professor, oral medicine: Woman of Distinction Award of the Jewish Blind Society, Institute of Directors, London.

Patricia K. Anderson, first-year doctoral student, social & behavioral sciences, School of Nursing: Received a Congressional Fellowship on Women & Public Policy cosponsored by the Women's Research & Education Institute and George Washington University Women's Studies Program.

Mary Alice Dragone, MS student, family health care nursing, School of Nursing: Awarded a Phi Kappa Phi Fellowship Award by the Honor Society of Phi Kappa Phi.

Jacob I. Fabrikant, professor, radiology: Appointed to the Committee on the Biological Effects of Ionizing Radiations of the National Academy of Sciences.

Service Award Recipients

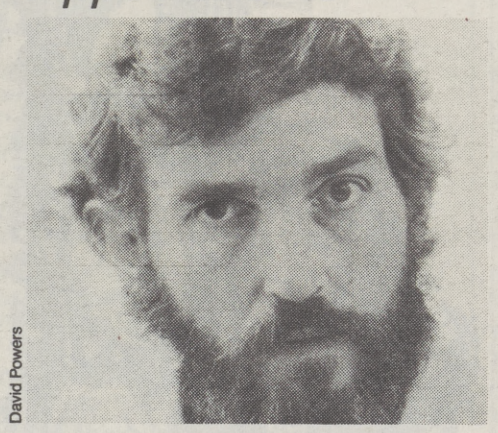
Service awards are issued on staff members' tenth anniversary of employment (or longer, in increments of five years). Names are provided by Personnel as awards are processed. Campus and Medical Center departments should send criteria to Personnel as employees become eligible for service awards.

Robert Barnes, 15 years, outdoors unlimited
Ruth Bradley, 20 years, materiel services
Thelma Brooks, 15 years, materiel services
Marilyn Bruneman, 25 years, cashier
Elmer Darden, 20 years, OR
Wanda Elliot, 10 years, transportation services
Harold Encarnacao, 10 years, materiel management
Beulah Goode, 15 years, professional fee billing
Micheline Handon, 15 years, nursing service
Samuel Hebert, 15 years, laboratory medicine
Diana Johnson, 15 years, radiology
Dorothy Johnson, 20 years, laundry/linen services
Douglas Johnson, 10 years, EMR
Susie Juanillo, 20 years, OB clinic
Roger Kraemer, 15 years, anesthesia
Flora Lowe, 20 years, accounts receivable
Patricia McClelland, 15 years, dermatology
Elsie Miller, 20 years, materiel services
Nancy Parenteau, 10 years, nursing service
Brenda Piper, 10 years, Chancellor's Office
John Robinson, 15 years, LPPI
James Roland, 20 years, materiel management
Margareta Tunerstedt, 10 years, OR
James Wood, 15 years, transportation services
Marilynn Wong-Namekawa, 10 years, nursing service
Deborah Yano-Fang, 10 years, nursing service

Publications

Deborah Greenspan, associate clinical professor, oral medicine; **John S. Greenspan,** professor & chair, oral biology & professor, pathology: Co-authors, *AIDS and the Dental Team* (Munksgaard, Copenhagen, 1986).

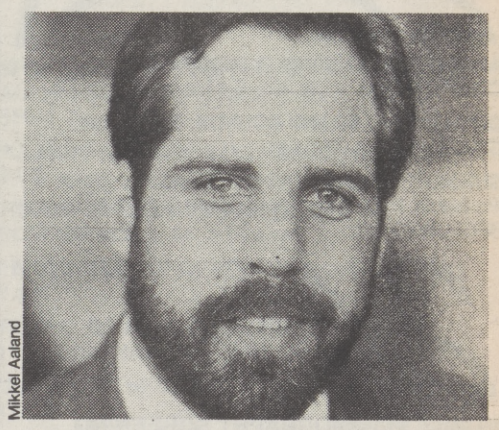
Appointments



David Powers

Hall

Zach W. Hall, chair, Department of Physiology, replacing William Ganong who has led the department since 1970. Head of the department's Division of Neurobiology, Hall came to UCSF in 1976 from Harvard, where he was associate professor of neurobiology. For the past 20 years he has studied the workings of the junction between nerve and muscle, where signals from the brain initiate muscle movement. Hall, who has received numerous awards, most recently was appointed a Jacob Javits Investigator in Neuroscience. He has been a member of the editorial boards of various journals and currently is on the editorial board of *The Journal of Neuroscience.*



Mikkel Aaland

Pearson

Andrew Pearson, manager, Telecommunications, Administrative Information Systems. Pearson comes to UCSF from the Pacific and Mountain Bell companies where he was an account executive serving the University of Arizona, Stanford and, for the past three years, UCSF. During that time he coordinated our recent telephone changeover.

Promotions

Promotions are made available to this publication after they are processed by the Personnel Department.

Julio Arriaza, clerk, patient escort service.

Karen Barreto, senior clerk, AIDS/medicine/SFGH.

Michael Collins, senior radiologic technologist.

Deborah Crump, administrative assistant II, building service/physical plant.

John Culver, administrative analyst, medicine/Rosalind Russell Lab.

Gail Hansen, administrative analyst, Cancer Research Institute.

Kristin Hill, project assistant II, Institute for Health & Aging.

David Kern, staff research associate I, stomatology.

Thomas Lupoli, administrative assistant II, medicine/AIDS/oncology.

Bonnie Luz, administrative assistant III, neurosurgery.

Marijo Montano, dental clinic assistant I, stomatology.

Macherie Placide, hospital clinical laboratory assistant II, lab med-clinical labs/SFGH.

Karla Populus, library assistant II, library.

Lynn Tomioka, financial assistant II, dentistry.

In Memoriam

Rosemary Ellis. A 1944 graduate of the School of Nursing, she received the UCSF Distinguished Alumni Award in 1985. Within a year of her graduation, Ellis became a head nurse at UC Hospital and later an assistant supervisor of nursing. She also held a campus teaching appointment until 1953 when she left the campus for a position at the University of Chicago, where she received advanced degrees in nursing. Ellis subsequently held positions at Case Western Reserve from 1964 until her retirement this year. Shortly before her death, she received the highest honor in the nursing profession, the Distinguished Contribution to Nursing Science Award of the American Nurses Foundation for her pioneering work in nursing theory.

Kevin J. Koumjian, 1983 graduate, UCSF-UCB joint medical program. Upon completion of his residency at SFGH, Koumjian became the first medical director of the non-profit Benton County Health Clinic in Ashland, Mississippi. From 1984 to 1985 he was the sole physician in Benton County, a rural community of 8,000. Fatally injured in an auto accident, his heart was successfully transplanted into another man. A fund has been established for the health clinic that Koumjian helped establish. Send donations to the Dr. Kevin Koumjian Memorial Fund, North Benton County Health Care, Inc., PO Box 92, Ashland, MS 38603.

Contracts & Grants Awarded

Delmont Morrison, psychiatry, S/M, CHILD Center, Kentfield, $317,000, Institute for Learning Difficulties, *Screening & Intervention for Kindergarten Children at Risk for Behavior & Academic Problems.*

Kent R. Olson, clinical pharmacy, S/P, $116,000, CA Department of Health Services, *Environmental Hazard Information & Response Project.*

Seymour Packman, pediatrics, S/M, $105,650, CA Department of Health Services, *Newborn Screening Program.*

H. Daniel Perez, medicine, SFGH, $14,200, Arthritis Foundation, Northern California Chapter, *Modulation of Polymorphonuclear Leukocyte Chemotactic Receptor by Sialic Acid.*

Steven D. Rosen, anatomy, S/M, $14,700, Arthritis Foundation, Northern California Chapter, *Mechanisms of Lymphocyte Migration into Arthritic Joints.*

Oscar Salvatierra, surgery, S/M, $99,357, NIH, *Expansion Grant Under the Organ Procurement Grant Program.*

Merle A. Sande, medicine, SFGH, $335,647, National Institute on Drug Abuse, *HTLV-III Infection in San Francisco IV Drug Users.*

Marilyn Savedra, family health care nursing, S/N, $151,946, Health Resources & Services Administration, *Pediatric Pain: Developing and Testing a Tool.*

Steven A. Schroeder, medicine, S/M, $900,000, Rockefeller Foundation, *Health of the Public: An Academic Challenge.*

Johnathan A. Showstack, Institute for Health Policy Studies, S/M, $124,978, HHS/ Planning & Evaluation, *Study of the Implementation of Outcome Indicators in Diabetes Control.*

Samuel J. Wycoff, dental public health & hygiene, S/D, $6,500, Miscellaneous Health & Welfare Agencies, *Community Care Licensing Staff Training Workshops.*

AIDS Research Funds

The UC Universitywide Task Force on AIDS now is accepting applications for the following 1987-88 awards:

- AIDS investigator awards and AIDS postdoctoral fellowships. New investigators who hold research or professional degrees at the doctoral level are encouraged to apply. A maximum of 15 grants will be awarded. Applications are due February 17, 1987.
- Individual research awards. Research may involve any of the basic, clinical or social science disciplines and must be relevant to AIDS. Applications are due March 2, 1987.

For further information contact the AIDS Task Force Office, 2199 Addison Street, Room 764, Berkeley, CA 94720, or call 642-0732.

Fellowships in Health Care Finance

The Robert Wood Johnson Program for Faculty Fellowships in Health Care Finance is offering a year of advanced training and field experience to examine the rapidly changing world of health care finance, plus a year of support for the completion of a research project.

The program is open to health care finance and health policy faculty as well as professionals in health-related disciplines committed to careers in teaching and research. Relevant backgrounds include health services and hospital administration, public administration, public policy, law, business, medicine, public health, political science and economics.

Application deadline is Monday, December 1. For further information call (301) 955-8316.

Two Approval Forms

The Contracts and Grants Office now requires that only two copies (not nine) of each safety approval be attached to researcher's original filing forms. Questions? Call x62977.

Today/Tomorrow

22 Saturday

ANESTHESIA MORBIDITY/MORTALITY CONFERENCE. HSW 301. 8-10 a.m.

ORTHOPEDIC GRAND ROUNDS. Bothin Aud., Children's Hosp. 8-9 a.m.

SURGERY GRAND ROUNDS: *Musician's Hand Problems.* Robert Markison, Hand Surg. Carr Aud., SFGH. 8:30 a.m.

24 Monday

MOBILE MAMMOGRAPHY SCREENING SCHEDULE

Women now can have low-cost mammograms—x-rays to screen for breast cancer—from a mobile van that travels to convenient shopping or downtown locations in San Francisco and remains for a week at a time.

Women need the approval of their physicians to have the mammogram. The procedure takes approximately 20 minutes and costs only $40. To make an appointment call 990-0459 or 476-2193 between 9 a.m. and 3:30 p.m.

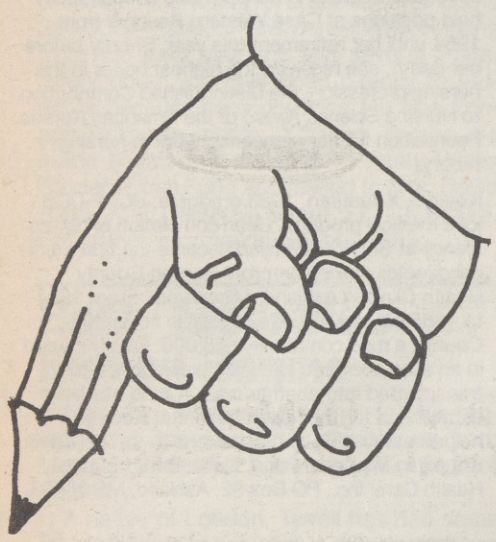
The van will be at the following locations for the next three weeks:

Nov. 24-26: Civic Center, on McAllister St. between Larkin & Polk in front of the State Bldg.

Dec. 1-5: Diamond Heights, on Diamond Heights Blvd. near Safeway.

Dec. 8-12: Financial District, on Geary St. between Kearny & Grant across from 1st Nationwide Bank.

OTOLARYNGOLOGY GRAND ROUNDS: *Partial Laryngectomy.* Michael Kaplan, Oto. *Mandibular Fractures.* Gary Feinberg, Oto. S 214. 8-10 a.m.



OPEN ENROLLMENT INFORMATION SESSION. Toland Hall. 11:30-1 p.m.

OVEREATERS ANONYMOUS MEETING: N 417. Noon. Call Dolores Phillips, 929-8651.*

LABORATORY MEDICINE CORE CURRICULUM: *Principles & Applications of Chromatographic & Other Drug Assay Techniques.* John Osterloh, Med. L 535. 2-3:30 p.m.

CVRI SEMINAR: *Regulation of Ion Channels by GTP-Binding Proteins.* Gabor Szabo, Physio., U Texas-Galveston. S 1364. 4-5:30 p.m.

LABORATORY MEDICINE GRAND ROUNDS: *Virologic & Serologic Diagnosis of HIV Infections.* Jim Carlson, Path., UCD. L 535. 4-5 p.m.

IMMUNOLOGY SEMINAR: *Two Types of Murine Helper T Lymphocytes That Secrete Different Lymphokines.* Timothy Mosmann, DNAX Res. Inst. HSW 302. 4 p.m.

25 Tuesday

ORAL & MAXILLOFACIAL SURGERY GRAND ROUNDS: Residents' Forum & Complications Conference. C 701. 8 a.m.

COMBINED MODALITY BREAST CANCER CONFERENCE. Surg. Clin. Conf. Rm., 6th fl. A. 8 a.m.

SFGH PEDIATRIC GRAND ROUNDS: *Clinical Manifestations of Invasive Hemophilus Influenza Disease.* Richard Bland, Ped. & CVRI. Carr Aud., SFGH. 8:30-10 a.m.

NEW EMPLOYEE ORIENTATION: *UCSF Policy, Procedures & Benefits.* Presented every other Tues. All new employees are urged to attend. S 214. 8:30 a.m.-noon. To register call x61645.

OBSTETRICS/GYNECOLOGY GRAND ROUNDS: *Issues for Women & the Family in China.* Chun-Nien Tsai, U Suzhou, China. S 1364. 9 a.m.

INTRODUCTION TO THE MEDICAL CENTER AT UCSF: For new employees at the Medical Center at UCSF. Presented every other Tuesday. 10 a.m.-3 p.m. M 169. Supervisors call Richard, x69438.

CENTER ON DEAFNESS ROUNDS: *Developing AIDS Resources for the Deaf Community.* Lynn Paleo, SF AIDS Fdtn. President's Confr. Rm., UCSF-Laurel Heights. 10:45 a.m.-noon.

PHARMACEUTICAL CHEMISTRY 221 SEMINAR: *Studies of Human Tumor Necrosis Factor.* James Larrick, Cetus-Immune Res. Lab. HSW 303. 11 a.m.

NEONATAL MORBIDITY & MORTALITY CONFERENCE: Julian T. Parer, Ob/Gyn; Roderic H. Phibbs, Ped. & CVRI; Sol Shnider, Anes. & Ob/Gyn. M 1486. Noon.

INTERNATIONAL FOLK DANCING: Led by Dean Linscott. No partner needed. Everyone welcome. MU Gym. 1:15-2:30 p.m. $2.*

SFGH GI-MEDICINE/SURGERY/RADIOLOGY IMAGING CONFERENCE. Rm. 1X58, SFGH. 3:30 p.m.

BIOCHEMISTRY/BIOPHYSICS SEMINAR: *5' CAP Structurer & Noncoding Regions of Eukaryotic mRNA: Effects on Translational Regulation.* Nahum Sonnenberg, Biochem., McGill U. HSW 301. 4 p.m.

OUTDOORS UNLIMITED ADVENTURE FILM SHOWCASE: Skiing Night. MU TV Lounge. 8 p.m.*

26 Wednesday

HAND SURGERY CONFERENCE: Journal Club. S 214. 7-8 a.m.

MULTIDISCIPLINARY TUMOR BOARD: M 1296. 7:30 a.m. Call Lourdes Saenz, coordinator, x61662.

SFGH ORTHOPEDIC SURGERY STAFF CONFERENCE. SFGH, Rm. 5K8. 7:30-9 a.m.

SFGH UROLOGY GRAND ROUNDS: Case Presentations. Cafeteria Confr. Rm. 1, SFGH. 7:30-9 a.m.

ENDOCRINE GRAND ROUNDS: *Fibroblast Growth Factor: Molecular & Biological Characterization.* Denis J. Gospodarowicz, Med. & Oph. M 1486. 8:30 a.m.

PRIMARY CARE LECTURE SERIES: *Low Back Pain & Joint Exam.* Nancy Byl, PT & FCM. A 455. 10 a.m.-noon.

FINANCIAL PLANNING SEMINAR: *Choosing Investments to Meet Your Needs.* John Beeson, Financial Planning & Benefits. Toland Hall. 10 a.m.-noon.

MEDICINE GRAND ROUNDS: *Thrombolitic Therapy in Pulmonary Embolism.* Michael Matthay, Med. Cole Hall. 11 a.m.-noon.

BROWN BAG TOURS LECTURE SERIES: *The Odds Are: You Lose!* An appraisal of casino games, lotteries & sports wagering. Michael L. Orkin, Statistics, CSU Hayward. HSW 300. Noon. Tapes of all talks available for listening in HSE 345, SIMA unit, UCSF Library. Call x64394.*

UCSF AL-ANON MEETING: For friends & families of alcoholics. C 517. Noon-1 p.m.*

HEAD & NECK TUMOR CONFERENCE. A 732. 1-3 p.m.

TRISERVICES CARDIOLOGY CONFERENCE. C 130. 4-5 p.m.

SFGH GI-MEDICINE/SURGERY PATIENT CARE CONFERENCE. Rm. 4H2, SFGH. 4:30 p.m.

CHILD NEUROLOGY CONFERENCE: Bruce Berg, Neuro. M 666. 4:30 p.m.

PHYSIOLOGY SEMINAR: *Control of Cytoplasmic Calcium in Retinal Rods & Its Role in Phototransduction.* Juan Korenbrot, Physio. S-758. 4 p.m.

COMMUNITY HEALTH TALKS: *Sports Injuries of the Knee.* Marvin H. Bloom, SFGH Sports Med. Clinic. Toland Hall. 7:30-9:30 p.m.*

1 Monday

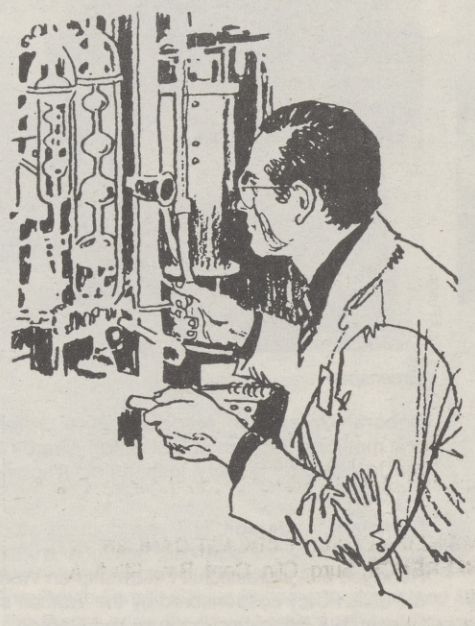
OTOLARYNGOLOGY DEPARTMENTAL ROUNDS: *Orbital Anatomy.* Mark Prendergast, Oto. *Vertigo & Hearing Loss from Trauma.* Daniel Sooy, Oto. S 214. 8-10 a.m.

HOSPITALS AUXILIARY EXHIBIT: On display for December will be etchings by Maumi Mori, prints & watercolors by Ann Hoogasian, watercolors by Steven Sundberg and oils by Andy Thomas. A portion of proceeds benefits patients of the Medical Center at UCSF. To purchase or reserve work, visit the Auxiliary Office, M 182, 9 a.m.-4 p.m., or call x64906.

IMMUNOLOGY SEMINAR: *T Cell Receptors: Ontogeny of Expression & the Structural Basis of Dual Recognition.* Ronald Germain, NIH. HSE 302. 11 a.m.

OVEREATERS ANONYMOUS MEETING: N 417. Noon. Call Dolores Phillips, 929-8651.*

LABORATORY MEDICINE CORE CURRICULUM: *Principles of Clinical Laboratory Analysis.* Hassan Khayan-Bashi, Lab. Med. & Jon Dreyer, Clin. Chem., VAMC. L 535. 2-3:30 p.m.



MACHINES & MEDICINE DEC 1

HISTORY AND PHILOSOPHY OF HEALTH SCIENCES & MEDICINE LECTURE: *Machines & Medicine: Technology & the American Hospital, 1890-1930.* Joel D. Howell, Int. Med., U Michigan. Toland Hall. 4 p.m. Reception to follow in U 456.*

LABORATORY MEDICINE GRAND ROUNDS: *Cell Biology of Histadine-Rich Glycoprotein.* Larry Leung, Hematol., Stanford. L 535. 4-5 p.m.

CVRI SEMINAR: *Electrophysiological Properties of Parasympathetic Ganglia that Limit Input to Airway Smooth Muscle.* Robert A. Mitchell, Physio. & Anes. S 1364. 4-5:30 p.m.

IMMUNOLOGY SEMINAR: *The Expression, Structure & Function of Class II MHC Molecules: Insights from Gene Transfer Experiments.* Ronald Germain, NIH. HSW 302. 4 p.m.

UROLOGY RADIOLOGY CONFERENCE: Emil A. Tanagho, Uro. M 460. 4:30-6 p.m.

2 Tuesday

ORAL & MAXILLOFACIAL SURGERY GRAND ROUNDS: Joint Orthodontic/Orthognathic Surgery Conference. C 701. 8 a.m.

COMBINED MODALITY BREAST CANCER CONFERENCE. Surg. Clin. Conf. Rm., 6th fl. A. 8 a.m.

OBSTETRICS/GYNECOLOGY GRAND ROUNDS: *Continued Use of Mid-Forceps.* Russell K. Laros, Ob/Gyn. S 1364. 9 a.m.

OBSTETRICS/PEDIATRICS & ANESTHESIOLOGY CONFERENCE: Julian T. Parer, Ob/Gyn; Roderic H. Phibbs, Ped. & CVRI; Sol Shnider, Anes. & Ob/Gyn. M 1486. Noon.

RETIREMENT INFORMATION TALK: General information on basic & voluntary retirement plans. N 517. Noon.

INTERNATIONAL FOLK DANCING: Led by Dean Linscott. No partner needed. Everyone welcome. MU Gym. 1:15-2:30 p.m. $2.*

MEYER LECTURES DEC 2

KARL F. MEYER LECTURES: *The Molecular Biology of Influenza: Structure.* Don C. Wiley, Biochem. & Molec. Bio., Harvard. *Replication.* Robert M. Krug, Lab. Viral & Gene Cellular Expression, Memorial Sloan-Kettering Cancer Cntr. HSW 301. 3:30-5 p.m.*

SFGH GI-MEDICINE/SURGERY/RADIOLOGY IMAGING CONFERENCE. Rm. 1X58, SFGH. 3:30 p.m.

LAUREL HEIGHTS PUBLIC INFO MEETING DEC 2

A public information meeting as part of an Environmental Impact Report on transport of hazardous materials to and from UCSF-Laurel Heights campus. Chancellor's Confr. Rm., Laurel Heights. 7 p.m.*

3 Wednesday

GRETTA DAY DEC 3

To include the symposium *International Health: Issues & Commitments.* Speakers include T.A. Lambo, World Health Organization, Geneva; Constance Holleran, International Council of Nurses, Geneva; and Helen Grace, W.K. Kellogg Foundation, followed by a forum, receptions & a dinner. (See page 1 for details.)

MULTIDISCIPLINARY TUMOR BOARD: L 34. 7:30 a.m. Call Lourdes Saenz, coordinator, x61662.

SFGH ORTHOPEDIC SURGERY STAFF CONFERENCE. SFGH Rm. 3K8. 7:30-9.

JEWELRY EXTRAVAGANZA DEC 3

Medical Center Auxillary gold and jewelry sale. Med. Sci. Lobby. 8 a.m.-5 p.m. (See page 8 for details.)*

PSYCHIATRY GRAND ROUNDS: *Premature Termination in Adolescent Treatment: Preliminary Results of a Follow-Up Study.* Dianna Hartley & Lynn Ponton, Psychr. LPPI Aud. 8-9 a.m.

ENDOCRINE GRAND ROUNDS: *Overview of Male Reproduction.* Robert D. McClure, Uro., VAMC. M 1486. 8:30 a.m.

PRIMARY CARE LECTURE SERIES: *Approaches to Alcoholism.* Gerrit Blauvelt, Psychr. A 455. 10 a.m.-Noon.

HOLIDAY CRAFTS FAIRE DEC 3 & 4

Crafts, food & entertainment featured in MU Gym, 10 a.m.-4 p.m. (See page 2 for details.)*

BROWN BAG TOURS LECTURE SERIES: *Turning Stress into Success.* Neil A. Fiore, Psych., UCB. HSW 300. Noon. Tapes of all talks available for listening in HSE 345, SIMA unit, UCSF Library. Call x64394.*

UCSF AL-ANON MEETING: For friends & families of alcoholics. C 517. Noon.*

ANATOMY SEMINAR: *Immunocytochemical Studies of Age-Related Changes in Adrenergic Neurons.* A. Hervonen, Biomed. Sci., U Tampere, Finland. HSE 1309. Noon.

HEAD & NECK TUMOR CONFERENCE. A 723. 1-3 p.m.

TRISERVICES CARDIOLOGY CONFERENCE. C 130. 4-5 p.m.

ARTIST RECEPTION DEC 3

A reception for artist Jillian Tyrell, whose batik tapestries are on display in the Faculty/Alumni House through Feb. 28. Faculty/Alumni House. 4:30-7 p.m. (See page 2 for details.)*

SFGH GI-MEDICINE/SURGERY PATIENT CARE CONFERENCE. Rm. 4H2, SFGH. 4:30 p.m.

CHILD NEUROLOGY CONFERENCE: Bruce Berg, Neuro. M 666. 4:30 p.m.

PATHOLOGY GRAND ROUNDS: *Interstitial Lung Diseases.* Martha Warnock, Path. HSW 508. 5:15-6:15 p.m.

ORAL BIOLOGY SEMINAR: *Cytoskeleton.* Mark Ryder, Dent. HSE 317. 5:20 p.m.

OB/GYN SATELLITE RECEPTION DEC 3

A reception to celebrate the opening of the Ob/Gyn satellite in Daly City, 333 Gellert Blvd. 6-8:30 p.m. (See page 7 for details.)*

COMMUNITY HEALTH TALKS: *Allergies: The Latest Information.* Oscar L. Frick, Ped. Toland Hall. 7:30 p.m.*

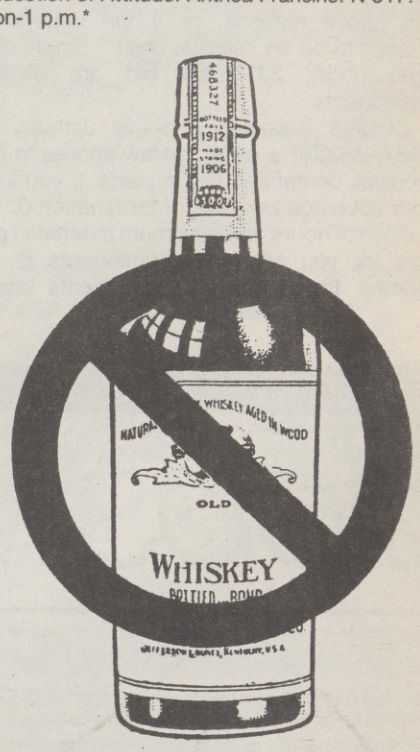
PATHS OF HEALING & WHOLENESS SEMINAR: *A Question of Attitude.* Anthea Francine. N 517. Noon-1 p.m.*



ALCOHOLICS ANONYMOUS MEETING: All are invited. HSE 336. Noon-1 p.m.*

WOMEN'S BASKETBALL CLUB: Open to all campus women. MU Gym. 6-7:30 p.m. Call Al Kerr for details, x61800.

DEVELOPMENT & TRAINING COURSES

Call x64032.

Pre-Supervisorial Training. Fri., Dec. 5, 12, 19 & Wed., Dec. 17.

CONTINUING EDUCATION

MEDICINE

Call x64251 unless otherwise noted.

Recent Advances in Occupational Cancer. Cathedral Hill Hotel, SF. Dec. 5-6. Call x65208.

AIDS & the Nervous System Symposium. SF. Dec. 11-12.

An Update in Neuro-Ophthalmology. SF. Dec. 11-12.

HELP ELIMINATE SCHEDULING CONFLICTS

In order to help the campus avoid conflicts in scheduling important events, the News & Public Information Services Department has a computerized calendar. It is suggested that faculty, students and staff call x61541 when they are planning an event to make sure nothing has been scheduled for that date. Please note that in order to reserve campus conference rooms and auditoriums, it is still necessary to call Millberry Union at x62571, Room Reservations at x64436, Faculty/Alumni House at x64723, Laurel Heights at x68100 or the individual school or department.

Benefits

COBRA Is Not a Snake

It's a new federal law that requires employers that sponsor group health plans — like UCSF — to offer a temporary extension at group rates to employees who lose coverage because:

- they leave or their employment is terminated (for any reason other than gross misconduct), or
- their hours are reduced.

This temporary extension also applies to your dependent spouse if he or she loses coverage because you:

- leave or reduce your hours as above;
- die, or
- are legally separated or divorced.

In the case of a dependent child, the option applies if the child loses coverage for any of the above reasons, or if the dependent ceases to be an "eligible child." Single children under 23 years old are eligible dependents.

COBRA becomes effective January 1, 1987. In UCSF's case, the law applies to the medical, dental and vision plans. If you lose your coverage because of termination or reduction of hours, the maximum extension period for you and your dependents is 18 months. In the case of dependents losing coverage because of death, divorce or separation; or a dependent child losing eligibility, the maximum extension period is three years.

If one of the above events happens, the extended coverage doesn't automatically fall into place. You have to notify the Benefits Office if you get a divorce or separation, or if your child loses dependent status. And your department has the responsibility of telling the Benefits Office in the case of a death, termination of employment or reduction of hours.

Then the Benefits Office will notify you and/or your family of your right to choose continuation coverage. The law says you have at least 60 days from the date you would lose coverage to inform the Benefits Office that you want the continuation coverage. If you do not choose it, it will end.

If you do choose it, you pay the full premium, of up to 102% of the current group rate. You should also know that certain things could cut your extended coverage short — for instance, if you don't pay your premium, or if you become eligible for Medicare during the interim, or you become an employee covered under another group plan.

The law also says that at the end of your extension period you must be allowed to enroll in an individual conversion plan, if the group health carrier provides that feature.

COBRA does *not* affect retirees. In regard to insurance coverage, the same rules as always apply to retiring employees.

All clear? If not, there's a detailed flyer on this. Ask your department's benefits rep.

You're wondering what COBRA stands for? Consolidated Omnibus Reconciliation Act. Pretty snakey term.

P.S. Cobra has nothing to do with Open Enrollment; i.e., there is no initial "sign-up." Should you become eligible, you must request it at that time.

How are the Funds Performing?

For those invested in the additional savings programs, here are the latest unit values and monthly factors (as of September 3):

- *Accumulation Unit Values*

Equity Fund: $40.654
Bond Fund: $29.396

- *Monthly Factors*

Savings Fund: .007807
Money Market Fund: .006160
GIC Fund: .008355

Questions, call x61400.

Get Those Open Enrollment Forms In!

The open enrollment period ends Wednesday, November 26, at 5 p.m. Forms must be *received* in the Benefits Office (LH 150) on 7th Avenue, or Campus Payroll (CED 322) by that time. Your next opportunity to enroll in insurances will not come up for another year. And remember, the new vision plan will not be open for enrollment next year. Questions? Talk to your department's benefits rep, quick.

There still is one open enrollment session remaining — Monday, November 24, 11:30 to 1 p.m. in Toland Hall. If you're still confused about your insurance plans, be sure to attend!

Jobs

The Personnel Department, located at 1350 Seventh Avenue, is open to receive applications every weekday from 8 a.m. to 5 p.m. with extended hours on Wednesdays, 8 a.m. to 6:30 p.m. Details of jobs listed below are available in the UCSF Employment Opportunities flyers. Copies are distributed campuswide and also are posted at the Personnel Office and in the main lobby of Moffitt Hospital.

Key:

UNION CODES:	CX - Clerical and Allied Services

Principal Clerk (CX). Environmental Health & Safety. #V-W47118. $1,556-$1,843. Filing Deadline: Open Until Filled.

Secretary II (CX). Biochemistry/Biophysics, VAMC. #M-F20996. $1,556-$1,843. Filing Deadline: Open Until Filled.

Secretary II (CX). Neurosurgery. #M-F49015. $1,556-$1,843. Filing Deadline: 11/26/86.

Administrative/ Professional

Sr Personnel Analyst. Personnel. #V-S20997. $2,733-$3,296. Filing Deadline: 11/26/86.

Management Services Officer II. Anatomic Pathology. #H-P51720. $2,490-$3,296. Filing Deadline: 12/3/86.

Administrative Analyst. Dental Clinic. #V-S29727. $2,267-$2,733. Filing Deadline: 11/26/86.

Sciences, Laboratory and Allied Services

Staff Research Associate II. Medicine, VAMC. #M-C49046. $2,070-$2,490. Filing Deadline: Open Until Filled.

Staff Research Associate I/II. Medicine, VAMC. #M-C16769. $1,811-$2,169 Or $2,070-$2,490. Filing Deadline: Open Until Filled.

Staff Research Associate I. Laboratory Medicine. #H-A50012. $1,811-$2,169. Filing Deadline: 11/26/86.

Staff Research Associate I. Neurology, SFGH. #M-CX6412. $1,811-$2,169. Filing Deadline: Open Until Filled.

Academic

The Senior Vice Chancellor - Academic Affairs distributes an Academic Employment Opportunities bulletin on a monthly basis to all UCSF departments. You may obtain a complete description of open academic positions from Academic Services, Room U 162, UCSF. Positions are located on the Parnassus campus unless otherwise noted.

Associate/Full Professor. Restorative Dentistry. #D-95. Filing Deadline: January 1, 1987.

Assistant Professor. Growth/Development, Dentistry. #D-96. Open until filled.

Associate/Full Professor. Metabolic Division, Medicine. #M-705. Open until filled.

Associate/Full Professor in Residence. Psychiatry. VAMC. #M-706. Filing Deadline: January 1, 1987.

Associate/Full Professor in Residence. Medicine. VAMC. #M-707. Open until filled.

Assistant Professor in Residence. Gastroenterology. SFGH. #M-708. Open until filled.

Assistant/Associate Professor in Residence. Laboratory Medicine. #M-710. Open until filled.

Assistant Research Molecular Biologist. Laboratory Medicine. #M-711. Open until filled.

Assistant Research Immunologist. Laboratory Medicine. #M-712. Open until filled.

Inpatient Nursing

For more information on the following positions, call nurse recruiter Lynda Purves, x62252.

Administrative Nurse III. Neurosurgery ICU. $2956-3568/hr.

Administrative Nurse I. Post Partum. $15.48-18.66/hr.

Clinical Nurse II. Neurosurgery/Neurology. $14.09-16.21/hr.

Clinical Nurse II. Cardiothoracic/Vascular/Eye Surgery. $14.09-16.21/hr.

Clinical Nurse II. Pediatric Intensive Care Unit. $14.09-16.21/hr.

Clinical Nurse II. Intensive Care Nursery. $14.09-16.21/hr.

Clinical Nurse II. Neurosurgery. $14.09-16.21/hr.

Clinical Nurse II. Oncology. $14.09-16.21/hr.

Clinical Nurse II. Intensive Care Unit. $14.09-16.21/hr.

Clinical Nurse II. General Surgery. $14.09-16.21/hr.

Clinical Nurse II. Medical/Cardiology. $14.09-16.21/hr.

Clinical Nurse II. Neuro ICU. 14.09-16.21/hr.

Clinical Nurse II. Coronary Care Unit. 14.09-16.21/hr.

Clinical Nurse II. Critical Care Float Unit—Adult. $14.09-16.21/hr.

Clinical Nurse II. Cardiovascular Special Care Unit. $14/09-$16.21/hr.

Psychiatric Inpatient Nursing

For more information on the following positions, call LPPI Director of Nursing Marilyn Rajokovich, x67361.

Clinical Nurse III. Psychiatric ICU. $2568-3097.

Clinical Nurse III. Children's Inpatient Unit. $2568-3097.

Clinical Nurse II. Psychiatric ICU. $2451-2820.

Hospital Psychiatric Nursing Assistant I. Behavioral & Neuro. Science. $1531-1813.

Leonard Andruski, weekend gardener

Some of the prizes in the United Way Raffle suggest some interesting sidelines on the part of the provider. For instance:

• ICN Head Nurse Helen Archer-Duste is providing a dozen donuts a month for a year from her donut shop. Her donut shop? Yes, she and her husband own two "Donuts 'n Things," one at Northpoint Mall at Fisherman's Wharf and another on Polk between California and Sacramento. Hard to picture this caretaker of critically ill infants in the context of a donut shop? "I know how to sell donuts," she says.

• Building Service's Leonard Andruski (four hours of gardening help and/or a tour of his own garden) lives in one of those rare SF locations that has a very large yard — and that's where you'll likely find him most weekends. He loves to garden, he finds it a wonderful wind-down from work; and the unkempt, overgrown tangle he encountered when he moved to his current residence is now Leonard's showpiece. Currently, he has snapdragons, calendulas and primroses blooming, and he just buried dozens of bulbs in anticipation of a daffodilly springtime.

• For the past 2½ years, Physical Therapy Manager Kathleen Brown (Tarot card reading) has been a student at the Berkeley Psychic Institute, which goes by the philosophy that everyone has psychic powers — you just have to learn to use them. Kathleen has reached the highest level as a student at the Institute, and her next step is to enter the teachers program. How does her staff like the fact that she has developed her psychic faculties? "They don't," she says.

• Volunteers Director Leona Hansen-Nealey (Danish cooking lesson and a copy of her cookbook *Vaer sa God!*) is a native of Denmark and an accomplished cook. Before she moved to San Francisco, she gave many demonstrations to benefit the Seattle Repertory Theatre and in association with the Danish Consulate. Finally, her friends persuaded her to publish her recipes. *Vaer sa God!* — which can be found in the Med Center Gift Shop — is a collection of Danish country inn recipes plus some of her own family recipes. The title, says Leona, is Danish for "Be so kind!" — the salutation which always precedes a meal in Denmark.

• Clinical Lab Manager Gary Low (tennis lesson and game) has both teaching and tournaments in his tennis background, but mostly he just plays for the love of it. He took it up when he was 14, it's been his favorite leisure-time pursuit ever since, and his regular hangout is at the tennis courts in Golden Gate Park.

• Accounts Receivable Manager Rufus Battles (personal flower arrangement) says, no, he has no talent when it comes to floral arrangement. He's about the only one of his friends who doesn't have any talent in this area. He can ruin a perfectly good-looking bunch of flowers just by trying to put it in a vase. Fortunately, he has one friend who is particularly adept with flowers, and this friend has agreed to help him out with his prize.

Who's Your Idea of a Distinguished Nurse?

Think in terms of all the nurses you know at UCSF. Include everyone — practicing nurses, nurses in education, nurses in administration. Now, who sticks out in your mind as an extraordinary credit to the profession? Is there someone whose project or approach to nursing has really made a difference?

When you find your answer, then you have your candidate for the 1987 Distinguished Nurse Award, to be presented on Founders Day in April. Anyone from any department is welcome to make a nomination, and self-nominations are perfectly acceptable.

To get you thinking, examples of past Distinguished Nurses include Mary Dunselman (1986), for her outstanding contributions as head nurse of the Psoriasis Day Care Center, and for her development and implementation of a program that extends beyond dermatological therapy to include patient education and emotional support; and 12-Moffitt Head Nurse Elaine McKenna (1985), for her development and implementation of the "Spend a Day with a Nurse" program.

Nominations are now open and will be until January 17. For further information on how to submit your nomination, you can pick up a brochure from the Nursing Administration office at L 171.

How Did the JCAH Survey Go?

Very well, it seems! The official written report won't come back for about five or six months, but if you were among the many who attended the summation conference directly following the three-day visit of representatives from the JCAH, State Department of Health and the California Medical Association, then you heard the nature of the comments related to the Medical Center: generally very positive.

Med Center JCAH coordinator Mary Jane Allison suggests mentioning some of the noteworthier aspects:

• An unexpected component of the survey was the arrival of a dietetics consultant from the State Department of Health. She spent three full days examining production and quality control methods in the Department of Nutrition and Dietetics. Her verdict: Outstanding! She absolutely sang their praises during the summation conference.

• Building Management was another subject of enthusiastic praise. The surveyor from the state said the standards held by this department far exceeded the norm.

• Medical Records practically wore a path across Parnassus providing the masses of records requested by the surveyors. But what a job they did!

• Mary Jane's words: "The nursing departments deserve kudos. . ."

• Mary Jane's sentiment: Only very few people come into direct contact with the surveyors while they're here. But everyone plays a part in keeping patient care up to — and beyond — the standards. That's what counts.

As it turned out, ACC was not surveyed along with rest of the Medical Center as expected, and November 17 was named for a return visit. How did it go? Find out next issue.

Why Are These People Eating Donuts?

Dawn Finch

Answer: Out of appreciation.

For donuts? Yes, of course that. But how the donuts got there was that a group of interns on 11-Long started thinking about what a challenging month it had been, and how the staff had been real troopers throughout, and how they really ought to do something a little extraordinary to show their appreciation — and this is what they came up with. A breakfast for the staff!

Shown are three of the guests — (seated) RNs Lauren Johnson, Karen Elkert and (standing, second from right) Sarah Angulo — and several of the hosts: (standing, left to right) MDs Mitch Katz, Nancy Bartlett, Doug Lessler, (Sarah) and Zail Berry.

Not shown are several more boxes of scrumptious-looking pastries — and several more staff members not quite willing to be photographed eating them.

People are Discovering Entertainment '87

Eyewitnesses will tell you: The Entertainment '87 coupon books offered by the Auxiliary are some deal. They cost $30 and there are hundreds of pages of half-off, two-for-one and discount deals at restaurants of all kinds, hotels, sporting events and many other entertainment opportunities. (Good example: You can save up to $250 on a balloon ride in Napa.) They'll be selling them until February and they're valid until next November 2 — so of course, the sooner you buy, the longer you have to use it. Some people are buying them as Christmas presents. Contact Joyce Garabedian in the Auxiliary Office, x64906.

New Ob/Gyn Satellite in Daly City

Our obstetrics patients in San Mateo, South San Francisco and surrounding areas, including the entire Northern Peninsula, no longer will have to travel some 40 miles a week to come to UCSF. The Department of Obstetrics, Gynecology and Reproductive Sciences will open in December a satellite practice in Daly City where a team made up of both men and women obstetricians and midwives will care for patients from the time of the original diagnosis through the birth of the baby.

Started at the urging of the San Mateo Department of Health, the new satellite will be an extension of the Faculty Ob/Gyn Group located in the Ambulatory Care Center. UCSF people at the new clinic will include Drs. Jeannette S. Brown, Russell K. Laros, Jr., Alan J. Margolis, Patricia A. Robertson, Donald L. Snyder; and midwives Jane Butler, Elinor Hein, Diane Hodgman and Deena K. Young.

The public is invited to an open house celebrating the new satellite practice on Wednesday, December 3, from 6 to 8:30 p.m. at 333 Gellert Boulevard.

The faculty group is planning to hold classes, workshops and public lectures, and staff will be available to lecture throughout the county.

Portable Award Ceremony

The fact that nursing aide Alberta Rutledge was in the hospital on the event of her 20th anniversary of employment didn't stop her colleagues on 9-Long from letting the event pass uncelebrated. Instead, they all piled into the car and took a field trip over to Ralph K. Davies where Alberta was hospitalized — and presented her pin. Gathered around Alberta in the photo are (clockwise, from left) Susan Barbour, RN; Nursing Director Helen Ripple (displaying Alberta's pin), David Ramirez, RN; and 9-Long Head Nurse Susan Alves-Rankin. Alberta's sister also was present, and kindly took the photo. Please see the "Gazette" section for other recent service award recipients.

Some Fast Facts on Food Service

Remember the Employee Task Forces? One of the goals of the Food Services Task Force was to make people more aware of the challenge faced by our Food Services Department. These are some of the statistics they compiled:

• The cafeterias serve 2,850 people per day.

• More than 1,000,000 people use the cafeterias each year.

• 412,00 patient meals are served annually.

• The cost per year of disposable serving items (plastic utensils, trays, cups, etc.) is more than $75,000.

• The cost per year of replacing lost non-disposable items (metal utensils, hard plastic trays, glasses, etc) is $20,000.

• Cafeteria sales do *not* totally offset operating expenses. How can everyone help alleviate this problem? Don't waste disposables, don't remove non-disposables from the cafeteria — and if you have any non-disposables tucked away in your office cupboards, bring them back!

Volume 1, Number 8 November 22-December 12, 1986

UCSF Medsounds

So, Who Won the Non-Stop Ride in the Elevator?

It was lucky Cristina Kadic from Radiation Oncology, who now has her choice of taking an uninterrupted ride to the floor of her choice in a Moffitt or Long elevator, courtesy of Carl Heller.

(If the elevator ride is too overwhelming, Carl is offering the option of a sightseeing plane ride for two.)

Who were the other winners in last week's United Way drawing? The list follows, but first, a word from Bill Kerr: Congratulations to everyone who participated. The biggest and best prize of all is the satisfaction of knowing we got behind the campaign in a big (united) way!

The winners:

- Glenn Hubbard from Materiel Services won an evening of babysitting or a basketball game and dinner from Bill Kerr.
- Shirley Alexander from the Pediatric Specialties Clinic won a flight over the Bay or a home-cooked dinner for two from Dennis Brimhall.
- Carol Garcia from Radiation Oncology won a dinner for two in any SF restaurant from Helen Ripple.
- Carmen Del Rosario from 12-Long won computer lessons and a week of hardware and software use from Ron Schumacher.
- Peggy Adams from 11-Long won two tickets to the Cal vs. Stanford game from Jacqueline Kuhn.
- Adrienne Low from 14-Long won a picnic lunch and sail on the Bay for two from Jane Hirsch.
- Jeanette Howard from Nutrition and Dietetics won a tennis lesson and game from Gary Low.
- Helen Lee from Biochemistry at CED won a blooming indoor orchid plant from Diana Johnson.
- Bruce Callarman from ER won gardening help and/or a tour of Leonard Andruski's garden.
- Pauline Nzeverem from the Laundry and Liz Rimocal from Patient Accounts both won cooking lessons and a cookbook from Leona Hansen-Nealey.
- Robert Price from OR won a dinner for two at a restaurant of Ron Lipsy's choice.
- Clariss Williams of Pager Communications won a professional massage by nurse Marion Flynn, donated by Sharon Esker.
- Kate Durham of MRI won a personally designed flower arrangement from Rufus Battles.
- Cliff De Magri from Radiation Oncology won a picnic lunch and sail for two on the Bay from Karen Akerson.
- Rich Willens from Biomedical Engineering won a framed photograph from Richard Roginski.

Mikkel Aaland

Kathy Balestreri won a Dim Sum lunch at The Fook from Mark Shafarman.

- Nora Sinclair from Laundry/Linen won a gourmet home-cooked dinner for two from Linda Groah.
- Doug Shaw from Biomedical Engineering won a gourmet home cooked dinner for two from Tony Wagner.
- Mary Guttman from the Clinical Lab won a very wet sail for two or a dinner hosted by Mary Jane Allison.
- Karen Tao from the Intensive Care Nursery won a homemade pineapple upside down cake from Susan Semonoff.
- Joe Young from OR won two tickets to the SF Symphony performance of the Messiah from Patty Perry.
- Clarissa Williams from Patient Escort won 10 lottery tickets and a pot of soup from Pat Wizeman.
- Charles Taylor from Budget and Reimbursement won a guided hike in Marin and picnic lunch from Kyra Janssen.
- Bob Haynes of Environmental Services won three tickets for aerobics classes at Rhythm and Motion from Mary Beth Inturrisi.
- Pat Dean from Materiel Serivices won two tickets to "Cats" from Toby Herfindal.
- Marina Ames from the Ophthalmology Clinic won four aerobics classes at the Kicks Company from Trudy Garrettson.
- Doris Nunez from Materiel Services won computer lessons and use; or a bottle of imported champagne from Jim Fink.
- Margareta Tunerstedt from OR won a month of laundry service for one or a night in North Beach from Dan Shydler.
- Cathy Cassell from Social Services won a hand-embroidered pillow from Inez Wieging.
- Joey Cruz from Environmental Services won a dozen donuts a month for a year from Helen Archer-Duste.
- Man-Chiu Hong from Laundry/Linen won a Tarot card reading from Kathleen Brown.
- Vivien Frantz from 11-Moffitt won a $10 gift certificate at Macy's from Joanne Pehkonen.
- Kathy Balestreri from Administration won a Dim Sum lunch at the Fook from Mark Shafarman.
- Cecelia Chase from ER won a loaf of homemade banana bread in a basket from Elaine McKenna.
- Monique Calonge from Nutrition and Dietetics won a Sierra Club photograpy book and calendar from Kathleen Wesner.
- Elise Hughes from PT won a bottle of wine from Susan Alves-Rankin's personal wine cellar.
- Mary Connaughton from Chaplain Services won a sailboat ride for two on the 78-foot Brigantine Rendezvous from Duffy Price.
- Ray Johnson from Nutrition and Dietetics won a car wash and wax from Marcellus Martin and Al Naklowycz.
- Rick Wagner from HISD won a vintage '85 homemade fruitcake from Chuck Kredensor.
- Sandra Wishon from 6-Long East won a gift certificate for a massage at Millberry Union from Patricia Shannon.
- Anastasio Abria from Nutrition and Dietetics won a delectable chocolate dessert from Debbie Yano-Fong and Mary Kane.
- Roland Marcelo from Environmental Services won a dozen Mrs. Fields cookies from Eleanor Louie.
- Susan Barbour from 9-Long won two matted penguin silk screens from Debbie Trevithick.
- Carolyn Moffitt from Nutrition and Dietetics won a personal color analysis from Margie Wolcott.
- Joy Cruz from the Clinical Lab won a handmade afghan or fixings for a spaghetti dinner from Susan Janvrin.
- Marilyn Coward from the Clinical Lab won four hours of personalized shopping from Sue Flannigan.
- Helen Benedetti from 11-Long won a Saturday night at the Cliff Crest Bed & Breakfast in Santa Cruz from the Med/Surg Nursing Division.
- Celestus Thorne from Laundry/Linen won five photo calligraphy badges with writing of choice from Bruce Wagman and Debra Ruben.
- Lucile Yango from Biochemistry at CED won a plant or bouquet of flowers from Ron Williams.
- Richard Felder from Patient Escort won one hour of video filming or 8mm movies transferred to VHS from Patsy Kelly.

(See page 2 for School of Pharmacy's activities for United Way.)

Bevy of Beauties on a Brass Bed

Actually, it's the bed that's the focal point of this picture, and the bed itself is an element of a larger picture: the newly renovated wing on 14-North for new moms and infants.

Previously, the unit was used as a general overflow area for post-partum patients, but along with the spruced-up decor came a new purpose. The 7-bed unit is designated as a rooming-in area, where low-risk moms and babies can be together in a more peaceful and private atmosphere. Temporarily called the "Mother-Infant Unit" or "Family-Centered Maternity Care Unit," it's a completely self-contained area, and there's even a room set up as an education center.

Oh, yes — the four on the brass bed are (back to front) Lynda Purves, Kathy Burkart, Rae Beauregard-Sund and Carol Moeglein, who happened to be visiting the unit during the recent opening reception.

Dawn Finch

Here Comes Christmas!

Better grab your calendar. . . .It may not be Thanksgiving yet when you read this, but lots of Christmas-y things are already happening — or coming right up!

Expanded Gift Shop
From November 17 through December 12, the Volunteers will have two holiday shopping activities going: For you and me there will be a table full of holiday goods for sale every day in the Medical Science Lobby; for patients there will be a holiday gift cart going 'round from floor to floor, selling cards, ornaments, etc.

Win a Bear for Our Kids!
Here's something to get you into the giving spirit: When you stop by the holiday table in the Med Sci lobby (see above), buy a 50¢ ticket for a chance at winning the big stuffed bear on display there — for the new playroom in the Children's Medical Center! If you win, the bear will bear your name.

Holiday Toy Drive
From November 24 through December 19 you will notice several big barrels located throughout the Med Center, CED and ACC included. These are for toys! Fill them up! This is the annual Holiday Toy Drive sponsored by the San Francisco firefighters. Among the recipients will be young UCSF patients spending their Christmas in the hospital.

Jewelry Sale
On Wednesday, December 3, the Auxiliary is holding their "Jewelry Extravaganza" in the Medical Sciences lobby. If gold, sterling silver and/or pearl jewelry (at discount prices) is on your Christmas shopping list, write this one in on your calendar. Time: 8 a.m. to 5 p.m.

Lobby Decorating
On Friday, December 5, everyone is invited to the ACC and Moffitt lobby decorating party from 8 to 10 a.m. This is definitely a more-the-merrier kind of occasion. Look for the flyer going around with the details on participation, or call the Volunteer office, x61196.

Department Decorating Contest
- Monday, December 15, is the last day to sign up for the Holiday Decorating Contest. The theme this year is "Winter Wonderland." The judging committee will be making their rounds on December 17, and if they find your department or unit to be among the most wonderfully decorated, you and your colleagues will win $50 worth of good things to eat from Gordo's on 9th Avenue (if you're a first place winner), or a big box of holiday treats (for honorable mentions). There will be a first place winner and three honorable mentions in each of three locations: combined Moffitt/Long Hospitals, ACC and CED. Again, there's a flyer being distributed that provides the details and the entry form.

Big Party
Monday, December 15, is also the date of the Campus Holiday Party in Millberry Union from 3 to 7 p.m. Everyone on campus is invited, and every room in the union will be filled with all varieties of live music and good things to eat. Look for your personal invitation in your mailbox. (See page 2 for details.)

Holiday Breakfast
For night shift Med Center employees, there will be a holiday breakfast on Tuesday, December 23. Your personal invitation will provide the location and time.

Christmas Carolers
The Volunteer Office currently is setting up a schedule for Christmas carolers. If your group would like to be among those bringing music to the hospital halls during the month of December, call x61196.

All of the above (almost) is brought to you by the Medical Center Holiday Planning Committee: Leona Hansen-Nealey (chair), Rufus Battles, Rae Beauregard-Sund, Kathleen Brown, Richard Felder, Anne Holly, Kim Kleeh, Vicki Kleemann, Sandy LeHane, Kathy McCaffrey, Bob McMullen, Vickie Wagner, Inez Wieging and Carol White.

David Powers

David Powers
